PROPOSAL FOR WORLD SUPPORT

It is the position of the Republican Party of ANGKORIA that the war in Cambodia is based on the territorial desires of Thailand and Vietnam, who seek to divide Cambodia at the Mekong River. The war serves the purpose of exterminating the Cambodian people and weakening the country until it can no longer maintain its sovereign boundaries.

The two major warring factions in Cambodia are supported by Thailand, on one side, and Vietnam on the other. Which ever side prevails, there will be no peace due to the territorial ambitions of either Thailand or Vietnam, who will continue to supply military support to overthrow the prevailing side.

We, the Republican Party of ANGKORIA, seek world support to promote peace in Cambodia through the elimination of Cambodian military groups who perpetuate the killing of Cambodian citizens. We seek the removal of all military factions from Cambodia, followed by open and free elections to establish a popular government.

Once a popular government is established by the Cambodian people, protection of the country should be provided through foreign sources. This is necessary because of the inability of the Cambodian military establishment to unify under a single government. Factional disputes within the military are the major obstacle to peace.

Once elected, the Republican Party of ANGKORIA will support foreign security forces to provide territorial integrity until the generation presently involved in the war is gone from the country. At this time Cambodia will provided its own security with a military organization dedicated to a unified and democratic Cambodia.

We seek your support to help establish a democratic Cambodia dedicated to a permanent peace. Such support will enable the heritage of ANGKOR WAT to be preserved for all the world.

Sincerely,

Borom Roth, Chairman
The Republican Party of ANGKORIA
