Dear Mr. Alwin,

Istanbul, 22 May, 1992

Coal undoubtedly has the most important share among all the other energy resources both in your country and other parts of the world. We should utilize this important energy resource rationally while causing the minimum damage to the environment. It is probably the first time we are attempting to prepare an international book which will cover all aspects of coal technology.

In the introductory part of this book, we are planning to provide a special section for the Presidents of some countries which have large coal reserves, where they can express their views.

It would be highly appreciated if you would kindly express your point of view about coal as an energy resource with a few sentences up to a paragraph.

We shall be looking forward to hearing from you.

Thanking you for your kind consideration, I am

Yours Sincerely,

Prof. Dr. Orhan Kural

(Editor)

Note : The book will be published using the latest technology and it will be mailed to you directly.

Enclosed is the list of chapters and some press reviews about the book published previously on coal.
