Your Excellency,

I am pleased to inform your excellency that I have been officially appointed by Professor Dr. Suchart Kosolkitiwong, the World Peace Envoy, to be the Secretary General of the Office of the World Peace Envoy. We are very much delighted to work in cooperation with your excellency in campaigning for eternal peace and the survival of human beings and the natural order which so much depends on us.

The world is in a serious predicament, as certain scientists would be able to explain. Your excellency may have heard that a huge bolide is approaching the Earth, and also that only recently a UFO (unidentified flying object) was shot down in the United States, killing eight aliens. Moreover, we have learned that Venus and Mars are preparing to make war on the Earth. The Office of the World Peace Envoy has deliberated on these events, and has decided on ways of tackling this critical situation.

Enclosed please find a copy of my abstract on "A Peace Concept: Stop the Space Programs for Global Security" being submitted for the NGO Committee on Disarmament Conference under the tentative title "New Realities: Disarmament, Peacebuilding and Global Security" to be held at the United Nations in April/May 1993 during the first week of the UN. Disarmament Commission meeting.

I am informing your excellency of these events in the hope of securing your excellency's support for the protection of our planet and to preserve its beauty and harmony. Please feel free to communicate with me. I will be very happy to be of any service to your excellency towards the propagation of the real and everlasting peace.

May I take this opportunity to send your excellency my best wishes for the coming year, and trust that our joint endeavours in the course of peace and fellowship will be rewarded in due course.

Best regards

Yours faithfully,

Phichai T

(Mr.) Phichai Tovivich, Ph.D.

ABSTRACT

There are not many people realize the really dangerous consequences of space programs which have been creating such tremendous damage to the security of the world. In addition to the **environmental problems** caused by the space programs, one of the most dangerous results of sending space craft to other planets is **the invasion of the earth by aliens**.

Over the years we have gathered more and more evidence about unidentified flying objects (UFOs) and in fact there have already been some aliens have already appeared on earth, though their visitations have been classified as top secret and consequently have not been given any publicity.

Although space programs may be seen as an advancement of science and technology and seem to be beneficial to mankind, the more they are developed, the more problems they create, especially with regard to the environment, affecting not only to the surface of the earth but also, and more importantly, space levels beyond the earth's surface. Eventually, human beings, will suffer as a result of these problems, which men themselves have created.

More over, the invasion of the earth by aliens will eventually create the possibility of space confrontation between human beings and aliens. As a matter of fact, there were two UFOs from Venus invaded the United States recently. One of them was shot down and eight aliens inside the object were killed in the Bermuda Triangle area about 400 miles east of South Carolina, U.S.A.. The other UFO escaped and went back to its own planet safely. This paper expresses the conviction that stopping the space program is an important way of increasing global security.

More details will be discussed at the meeting including evidence regarding the different appearances of aliens from Mars and Venus, and a description of their characteristics will also be given. A proposal on how to communicate with the aliens as well as strategies for peace and for the prevention of war will be presented.

The world is still very far away from the real and everlasting peace as the hearts of world leaders and their lips are saying different things as regard peace. Peace cannot be built by just writing the word "PEACE" on a piece of paper. More NGOs should be invited to participate and to work for peace because an NGO has no self benefit from the causes of non peaceful ways and means. They are therefore in a better position to see how to stop the causes of war and to create new realities for peace building and global security.
